Introduction

Google AdSense Plugin allows you to insert the adsense responsive banners into your OS Property items. It takes less than five minutes and you can start earning money from adsense. To install the plugin, please follow these steps:

Access the Joomla Extension Manager

The first thing you need to do is to login to the administrative area of your Joomla website. Once you do that, access the Joomla Extension Manager by going to **Extensions -> Extension Manager**.

Once you open the Extension Manager, you have three options to choose from to install your extension. In most cases, you should go for the first option but it's good to know that there are alternatives.

Option 1: Upload Package File

This is one of the most convenient options available. All you need to do is hit the Browse button, browse to the location of your plugin archive file on your local computer, and press the Upload & Install button.

Option 2: Install from Directory

This option is suitable for large extensions that exceed in size the server PHP Upload File size limitation and cannot be uploaded through the previous method. Plugin must be uploaded via FTP to a folder in your hosting account since FTP can transfer much bigger files.

Once you have uploaded the plugin directory to your hosting account, go to the Extensions Manager and specify the path to that folder. Finally, press the Install button. Joomla 3 will check the folder you've specified and install the plugin if it is uploaded correctly.

Install from Directory

Install Directory

/home/jHackGuard

Install

Option 3: Install from URL

The third available option for plugin installation is directly through an URL. All you need to do is to enter the direct address of the zip archive with the plugin and press the Install button. Joomla 3 will download, extract and make the necessary installations for you.

Install from URL

Install URL

http://yoursite.com/extension.zip

Install

After installing plugin, you must activate it from **Plugins manager**

The screenshot shows the Joomla! Plugin Manager interface. At the top, there's a header "Plugin Manager: Plugins" with the Joomla! logo. Below the header, there are several buttons: "Edit", "Enable", "Disable", "Check In", "Help", and "Options". A search filter is set to "Google". The main area displays a table of installed plugins. The table has columns for "Status", "Plugin Name", "Type", "Element", "Access", and "ID". One plugin is listed: "DE Property - Google AdSense" with status "Enabled", type "csp:property", element "googleadsense", access "Public", and ID "10000".

Plugin parameters

Parameters	Description
Publisher ID	Format: ca-pub-xxxxxxxxxxxxxxxxxx You need to register the Publisher ID from :
